

**Vident Core U.S. Equity Fund®**

Trading Symbol: VUSE

Listed on: NYSE Arca, Inc.

**Summary Prospectus**

December 31, 2018

www.videntfinancialsolutions.com

Before you invest, you may want to review the Fund’s Prospectus and Statement of Additional Information (“SAI”), which contain more information about the Fund and its risks. The current Prospectus and SAI, each dated December 31, 2018, are incorporated by reference into this Summary Prospectus. You can find the Fund’s Prospectus, SAI and other information about the Fund online at [www.videntfinancialsolutions.com/VUSE](http://www.videntfinancialsolutions.com/VUSE). You can also get this information at no cost by calling 1-800-617-0004 or by sending an e-mail request to [ETF@usbank.com](mailto:ETF@usbank.com).

**IMPORTANT NOTE:** Beginning on January 1, 2021, paper copies of the Fund’s shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the shareholder reports from your financial intermediary, such as a broker-dealer or bank. Instead, the shareholder reports will be made available on a website, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

You may elect to receive all future Fund shareholder reports in paper, free of charge. If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. Please contact your financial intermediary to inform them that you wish to continue receiving paper copies of Fund shareholder reports and for details about whether your election to receive reports in paper will apply to all funds held with your financial intermediary.

**Investment Objective**

The Vident Core U.S. Equity Fund (the “Fund” or “U.S. Equity Fund”) seeks to track the performance, before fees and expenses, of the Vident Core U.S. Stock Index™ (the “Index” or the “U.S. Stock Index”).

**Fees and Expenses of the Fund**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund (“Shares”). This table and the Example below do not include the brokerage commissions that investors may pay on their purchases and sales of Shares.

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees <sup>1</sup>	0.50%
Distribution and/or Service (12b-1) Fees	None
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	0.50%

<sup>1</sup> Restated to reflect the Fund’s contractual management fee effective January 31, 2018.

**Expense Example**

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the Shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

<b>1 Year</b>	<b>3 Years</b>	<b>5 Years</b>	<b>10 Years</b>
\$51	\$160	\$280	\$628

**Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. For the fiscal year ended August 31, 2018, the Fund’s portfolio turnover rate was 63% of the average value of its portfolio.

## Principal Investment Strategies of the Fund

The Fund employs a “passive management” – or indexing – investment approach designed to track the performance of the Index.

### *The Vident Core U.S. Stock Index™*

The Index is a rules-based, systematic strategy index comprised of equity securities of issuers domiciled and traded in the United States. The starting universe of eligible companies in the Index consists of U.S.-listed common stock of U.S. companies with market capitalizations of at least \$1 billion (\$800 million for companies already in the Index), meeting certain minimum liquidity requirements, and not structured as master limited partnerships. The universe of eligible companies is then screened to remove companies with significant accounting risks, governance risks, or other extreme risks, as described below.

The Index uses a forensic accounting model to score and rank companies in the Index universe based on a variety of accounting-related metrics (e.g., revenue recognition, earnings quality, changes in accruals, depreciation to capital expenditures, changes in days sales outstanding). The forensic accounting model eliminates the weakest 10% of companies from the Index universe.

The Index also assesses the corporate governance policies and practices of companies in the Index universe and scores such companies based on the number of such risks identified. Companies within each sector with the worst corporate governance scores are eliminated. Up to 10% of the companies in the Index universe may be eliminated by this screen.

Finally, the Index assesses companies in the Index universe for other extreme risks by identifying extraordinary events that may place shareholders’ capital at risk. Such extreme risks may include:

- A senior executive has been dismissed or faces prosecution for personal misconduct or misrepresentation
- The company has been late in its U.S. Securities and Exchange filings sometime in the past 12 months
- The company has come under investigation, or been subject to fine, settlement, or conviction for issues related to securities fraud, misrepresentation, or deficiencies in investor protection sometime in the past two years
- The company is experiencing difficulties obtaining needed financing or refinancing support
- The company is in breach of existing debt covenants
- The company is under threat of exchange delisting

Any companies flagged for any of the above extreme risks are removed from the Index universe.

The stocks remaining in the resulting universe are then evaluated, scored and ranked utilizing a proprietary multi-factor model, where each factor seeks to score different stock attributes (such as valuation, quality and momentum). At the time of each reconstitution, the stocks in the Index are weighted based on their relative scores, subject to a maximum allocation of 0.5% for any individual stock and certain liquidity thresholds. Overall sector weights are established based on the market capitalization of the universe of U.S.-listed common stocks of U.S. companies at the time of each reconstitution of the Index. The following are the major market sectors included in the Index: communication services, consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, real estate, and utilities. A sector is comprised of multiple industries. For example, the energy sector is comprised of companies in, among others, the natural gas, oil, and petroleum industries.

All rules are systematized and rely on data available at the end of each rebalancing period. The Index is reconstituted and rebalanced semi-annually in January and July.

The Index was created in 2015 by Vident Financial, LLC, the Index Provider, for use by the Fund.

### *The Fund’s Investment Strategy*

The Fund attempts to invest all, or substantially all, of its assets in the common stocks that make up the Index. The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it may invest in all of the component securities of the Index, but may, when the sub-adviser believes it is in the best interests of the Fund, use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole.

Under normal circumstances, at least 80% of the Fund’s total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities. Exchange Traded Concepts, LLC (“ETC” or the “Adviser”), the Fund’s investment adviser, expects that, over time, the correlation between the Fund’s performance and that of the Index, before fees and expenses, will be 95% or better.

To the extent the Index concentrates (i.e., holds more than 25% of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index.

## Principal Risks of Investing in the Fund

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. The following risks could affect the value of your investment in the Fund:

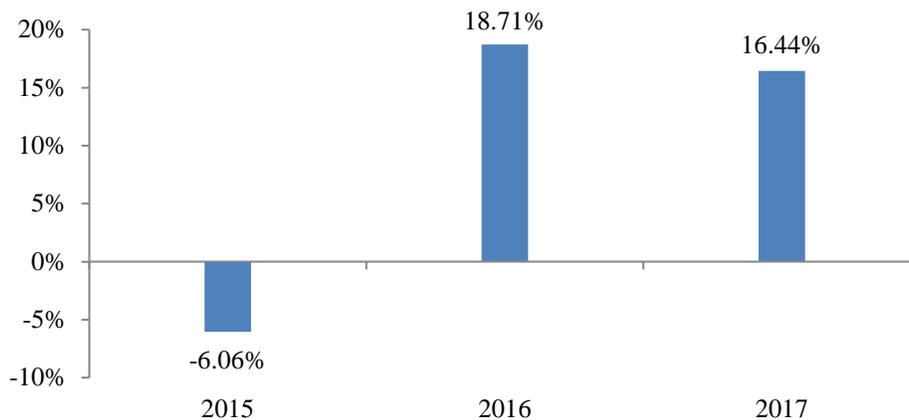

- **Equity Market Risk.** The equity securities held in the Fund’s portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, sectors, or companies in which the Fund invests. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stocks and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.
- **Large-Capitalization Investing.** The Fund invests primarily in the securities of large cap companies. As a result, the Fund’s performance may be adversely affected if securities of large cap companies underperform securities of smaller-capitalization companies or the market as a whole. The securities of large cap companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion.
- **Market Risk.** The trading prices of equity securities and other instruments fluctuate in response to a variety of factors. The Fund’s net asset value (“NAV”) and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.
- **Mid-Capitalization Investing.** The Fund may invest in the securities of mid-capitalization companies. As a result, the Fund’s performance may be adversely affected if securities of mid-capitalization companies underperform securities of other capitalization ranges or the market as a whole. Securities of smaller companies are often more vulnerable to market volatility than securities of larger companies.
- **Small-Capitalization Investing.** The Fund may invest in the securities of small-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Small-capitalization companies may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.
- **Passive Investment Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to its Index.
- **Portfolio Turnover Risk.** The Fund may trade all or a significant portion of the securities in its portfolio in connection with each rebalance and reconstitution of its Index. A high portfolio turnover rate increases transaction costs, which may increase the Fund’s expenses. Frequent trading may also cause adverse tax consequences for investors in the Fund due to an increase in short-term capital gains.
- **Sector Risk.** To the extent the Fund invests more heavily in particular sectors of the economy, its performance will be especially sensitive to developments that significantly affect those sectors. The Fund may invest a significant portion of its assets in the following sectors and, therefore, the performance of the Fund could be negatively impacted by events affecting each of these sectors.
  - **Consumer Discretionary Sector Risk.** The success of consumer product manufacturers and retailers is tied closely to the performance of domestic and international economies, interest rates, exchange rates, competition, consumer confidence, changes in demographics and consumer preferences. Companies in the consumer discretionary sector depend heavily on disposable household income and consumer spending, and may be strongly affected by social trends and marketing campaigns. These companies may be subject to severe competition, which may have an adverse impact on their profitability.
  - **Financial Sector Risk.** This sector can be significantly affected by changes in interest rates, government regulation, the rate of defaults on corporate, consumer and government debt, the availability and cost of capital, and fallout from the housing and sub-prime mortgage crisis. Insurance companies, in particular, may be significantly affected by changes in interest rates, catastrophic events, price and market competition, the imposition of premium rate caps, or other changes in government regulation or tax law and/or rate regulation, which may have an adverse impact on their profitability. This sector has experienced significant losses in the recent past, and the impact of more stringent capital requirements and of recent or future regulation on any individual financial company or on the sector as a whole cannot be predicted. In recent years, cyber attacks and technology malfunctions and failures have become increasingly frequent in this sector and have caused significant losses.
  - **Health Care Sector Risk.** Companies in the health care sector are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines and an increased emphasis on the delivery of healthcare through outpatient services.

- **Industrial Sector Risk.** The industrial sector may be affected by changes in the supply of and demand for products and services, product obsolescence, claims for environmental damage or product liability and general economic conditions, among other factors.
- **Information Technology Sector Risk.** Market or economic factors impacting information technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments. The value of stocks of information technology companies and companies that rely heavily on technology is particularly vulnerable to rapid changes in technology product cycles, rapid product obsolescence, government regulation and competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Stocks of information technology companies and companies that rely heavily on technology, especially those of smaller, less-seasoned companies, tend to be more volatile than the overall market. Information technology companies are heavily dependent on patent and intellectual property rights, the loss or impairment of which may adversely affect profitability.
- **Shares May Trade at Prices Other Than NAV.** As with all exchange traded funds ("ETFs"), Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

## Performance

The following performance information indicates some of the risks of investing in the Fund. The bar chart shows the Fund's performance for the calendar years ended December 31. The table illustrates how the Fund's average annual returns for the 1-year and since inception periods compare with those of a broad measure of market performance and the Index. The Fund's past performance, before and after taxes, does not necessarily indicate how it will perform in the future. Performance information is also available on the Fund's website at [www.videntfinancialsolutions.com](http://www.videntfinancialsolutions.com) or by calling the Fund toll free at 1-800-617-0004.

**Calendar Year Total Returns**

For the year-to-date period ended September 30, 2018, the Fund's total return was 3.98%.

During the period of time shown in the bar chart, the Fund's highest quarterly return was 8.86% for the quarter ended December 31, 2016, and the lowest quarterly return was -10.50% for the quarter ended September 30, 2015.

**Average Annual Total Returns  
For the Periods Ended December 31, 2017**

	<b>1 Year</b>	<b>Since Inception (1/21/2014)</b>
Return Before Taxes	16.44%	9.13%
Return After Taxes on Distributions	16.10%	8.76%
Return After Taxes on Distributions and Sale of Shares	9.56%	7.10%
<b>Vident Core U.S. Stock Index/Vident Core U.S. Equity Index<sup>1</sup></b> (reflects no deduction for fees, expenses, or taxes)	16.54%	8.97%
<b>MSCI US IMI Index – Net</b> (reflects no deduction for fees, expenses, or taxes)	20.59%	11.03%
<b>Morningstar US Market Total Return Index</b> (reflects no deduction for fees, expenses, or taxes)	21.47%	11.79%
<b>S&amp;P 500 Index</b> (reflects no deduction for fees, expenses, or taxes)	21.83%	12.21%

<sup>1</sup> Effective January 6, 2016, the Fund’s investment objective changed to track the performance, before fees and expenses, of the Vident Core U.S. Stock Index. Prior to January 6, 2016, the Fund’s investment objective was to track the price and total return performance, before fees and expenses, of the Vident Core U.S. Equity Index. Performance shown for periods prior to January 6, 2016 is that of the Vident Core U.S. Equity Index.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates during the period covered by the table above and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor’s tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Shares through tax-deferred arrangements such as an individual retirement account (“IRA”) or other tax-advantaged accounts.

The Fund changed its benchmark index from the MSCI US IMI Index – Net to the Morningstar US Market Total Return Index because the Index Provider believes that the new benchmark index provides comparable information to investors at a lower cost.

**Management**

*Investment Adviser and Sub-Adviser*

Exchange Traded Concepts, LLC serves as investment adviser to the Fund.

Vident Investment Advisory, LLC (“VIA” or the “Sub-Adviser”) serves as sub-adviser to the Fund.

*Portfolio Managers*

Denise M. Krisko, CFA, President of VIA, has been a portfolio manager of the Fund since December 2014 and was previously the Fund’s portfolio manager from its inception in January 2014 until November 2014 with the Fund’s previous sub-adviser.

Austin Wen, CFA, Portfolio Manager of VIA, has been a portfolio manager of the Fund since December 2018.

**Purchase and Sale of Shares**

Shares are listed on a national securities exchange, such as the NYSE Arca, Inc. (the “Exchange”), and most investors will buy and sell Shares through brokers at market prices, rather than NAV. Because the Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only Authorized Participants (“APs”) (typically, broker-dealers) may purchase or redeem. Creation Units generally consist of 100,000 shares, though this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the “Deposit Securities”) and/or a designated amount of U.S. cash.

**Tax Information**

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

**Financial Intermediary Compensation**

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser, the Sub-Adviser or their affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.
